**Ipack-Ima spa supports FAI :
Mr. Corbella: "Companies must show their commitment to corporate social
responsibility in tangible ways"**

Ipack-Ima spa, organizer of Pharmintech, recently chose to support FAI as a Corporate Golden Donor.

FAI stands for Fondo Ambiente Italiano, the National Environmental Fund, since 35 years active in protecting and restoring Italy's extraordinary artistic and environmental heritage. Castles, villas, historical parks, green areas and landscapes of pristine beauty in every part of the country today bear testimony to Italy's splendour thanks to FAI's commitment and to the help of its supporters.

"We believe it is the duty of a company like Ipack-Ima, which plays a primary role in Italy's industrial system, to support a prestigious organization like FAI in its ongoing commitment to safeguard and enhance out great artistic and environmental heritage - says Ipack-Ima spa CEO Guido Corbella, -. Our exhibitions and collective marketing actions open a new prospective, new opportunities and markets for a great number of Italian and international companies. For this reason any initiative involving companies in crucial corporate social responsibility projects in parallel to their ordinary economic activity is of paramount importance to us; FAI's great care and devotion to the conservation of the environment and of Italy's cultural and artistic heritage is certainly one of these - says Mr. Corbella".
